

## ANNOUNCEMENTS

### *International Conference on Stochastic Point Processes*

An international conference on the topic "Stochastic point processes: statistical analysis, theory, and applications" will be held at the IBM Research Center, Yorktown Heights, New York on August 2-7, 1971, the week before the International Statistical Institute meetings in Washington, D. C. The aim of the conference is to bring mathematicians and statisticians working in this field together with workers in applied fields such as ecology, neurophysiology, traffic studies, reliability, geography, forestry, epidemiology, and geophysics. Further information can be received from

Dr. P. A. W. Lewis  
Mathematical Sciences Department  
IBM Research Center  
P. O. Box 218  
Yorktown Heights, New York 10598

### *First National Biophysics Conference*

The First National Biophysics Conference will be held in Bucharest on May 25-26, 1971. This conference will deal with:

- (a) the reception and conduction of information in biological systems, and
- (b) membranes and cellular biophysics.

For further information, write to

Professor Dr. V. Vasilescu  
President of the Organizing Committee  
Union des Sociétés des Sciences  
Médicales de la République Socialiste  
de Roumanie
