

A REDUCTION IN PAGE CHARGES

The Council of the Biophysical Society has acted to reduce page charges to authors from \$20 to \$15, effective with manuscripts received after June 30th. The Society hopes that no investigator will be prevented by lack of funds from submitting his paper to the *Biophysical Journal*.

Those authors who have resources for publication expenses, however, will be expected to pay the \$15 page charge. Income from page charges covers almost a fifth of the cost of a printed page and this income is essential to the Editor's program for expanding the research pages of the *Journal*.

Biophysical Discussions

FIRST OF A SERIES

Fast Biochemical Reactions in Solutions, Membranes, and Cells

Proceedings of a Meeting sponsored by
the Biophysical Society

2-5 April 1978 at Airlie, Virginia

18 Research Papers with Discussion
43 Extended Abstracts

450 pages, *hard-covered book*, 7 x 10, 100 graphs and illustrations, fully indexed.

Special prepublication price \$15 prepaid. Orders received after 1 August 1978, \$25.

Order from: The Rockefeller University Press, Order Service, 1230 York Avenue, New York 10021 U.S.A.

OR

Enter your 12 month subscription to the *Biophysical Journal* at \$80 (\$86 Europe) and receive your *soft-covered book* as your October 1978 issue. Remit to the Biophysical Journal, Post Office Box 5108, Church Street Station, New York, 10249.

XIth INTERNATIONAL CONGRESS OF BIOCHEMISTRY

**Toronto Canada
July 1979**

**The Canadian Biochemical Society extends
an invitation to all biochemists to meet in
Toronto, Canada, on July 8 - 14, 1979**

The scientific programme will be based on symposia given by invited speakers and on poster sessions. The programme will be divided into 13 subject areas covering the following topics (symposia and poster sessions will be devoted to each of them):

1. Structure, organization and replication of genetic elements.
2. Genetic expression and its regulation.
3. Structure and function of proteins.
4. Mechanism and regulation of enzyme action.
5. Membrane structure and function.
6. Bioenergetics and transport.
7. Biochemistry of growth and differentiation.
8. Biochemical aspects of immunology.
9. Neurochemistry.
10. Biochemistry of sensory, contractile and motile systems.
11. Hormones: biochemistry and molecular mechanisms of action.
12. Molecular mechanisms of disease.
13. Environmental biochemistry.
