

International
Journal of **Biological**
Macromolecules
structure, function and interactions

The rapidly expanding field of biological macromolecular research is clearly of vital importance with the numerous exciting advances being made. Recent developments have led to the need for greater communication between the various disciplines involved.

International Journal of Biological Macromolecules helps to focus the different approaches to the study of biological macromolecules and topics covered emanate from the following disciplines:

- Biophysics
- Biochemistry
- Physical Chemistry
- Bio-organic Chemistry
- Molecular Biology
- Biomedical Science

International Journal of Biological Macromolecules contains original research papers preliminary communications and notes to the editor. The journal also includes occasional review articles, book reviews and a calendar of forthcoming events.
