

## GEORG-AUGUST-UNIVERSITÄT GÖTTINGEN

Stiftung Öffentlichen Rechts  
Bereich Humanmedizin

Universitätsklinikum – Medizinische Fakultät

DFG Research Center Molecular  
Physiology of the Brain (CMPB)

The Advanced Microscopy section "Microscopy at the Nanometer Range" of the DFG Research Center for Molecular Physiology of the Brain (CMPB; [www.cmpb.uni-goettingen.de](http://www.cmpb.uni-goettingen.de)) is offering a

### POSTDOC POSITION

in the field of high resolution microscopy based on advanced x-ray methods. Classical x-ray microscopy using Fresnel zone plates as well as novel lens-less x-ray imaging techniques have made significant progress in recent years offering new tools and opportunities for biophysics and neuroscience.

The hosting group has ample experience in x-ray biophysics and access to both national and international facilities of synchrotron radiation.

The center offers an excellent infrastructure and a unique research environment in neurosciences and biophysics.

The ideal candidate has already a strong background in neurobiophysics and/or x-ray imaging and is exceptionally motivated to acquire or complement her/his competence in these fields.

Applicants should submit curriculum vitae, a description of past accomplishments and future goals. Applications with the standard documents (CV, index of publications, diplomas) should be sent in by February 15<sup>th</sup> 2006 to **Prof. Dr. T. Salditt, Institute for X-Ray Physics, Friedrich-Hund-Platz 1, 37077 Göttingen, Germany**, E-mail: [tsaldit@gwdg.de](mailto:tsaldit@gwdg.de).

## Meet in Long Beach in 2008!

### Biophysical Society 52<sup>ND</sup> Annual Meeting

Joint Meeting of the Biophysical Society 52nd Annual  
Meeting and 16th International Biophysics Congress

Long Beach Convention Center  
Long Beach, California  
February 2–6, 2008
