

BIOPHYSICAL JOURNAL

CONTENTS

August 1975 volume 15 number 8

- 747 CONFORMATIONAL CHANGES OF GLYCERALDEHYDE-3-PHOSPHATE DEHYDROGENASE OBSERVED USING LASER LIGHT-SCATTERING SPECTROSCOPY. *R. Gabler, N. C. Ford, and E. W. Westhead*
- 753 IONTOPHORESIS OF CYCLIC AMP. *Morrel H. Cohen, David J. Drage, and Anthony Robertson*
- 765 STIMULATION OF LATE INTERPHASE *DICTYOSTELIUM DISCOIDEUM* AMOEBAE WITH AN EXTERNAL CYCLIC AMP SIGNAL. *Anthony Robertson and David J. Drage*
- 777 MEMBRANE LIPID, NOT POLARIZED WATER, IS RESPONSIBLE FOR THE SEMI-PERMEABLE PROPERTIES OF LIVING CELLS. *Ronald N. McElhaney*
- 785 NUMBER FLUCTUATION SPECTROSCOPY OF MOTILE MICROORGANISMS. *Dale W. Schaefer and Bruce J. Berne*
- 795 POTENTIAL ENERGY BARRIERS TO ION TRANSPORT WITHIN LIPID BILAYERS. STUDIES WITH TETRAPHENYLBORATE. *Olaf Sparre Andersen and Martin Fuchs*
- 831 RADIATION DAMAGE TO BULL SPERM MOTILITY. III. FURTHER X-RAY STUDIES. *Robert Rikmenspoel*
- Brief Communications*
- 843 HOW MANY CONDUCTANCE STATES DO POTASSIUM CHANNELS HAVE? *Ted Begehsich and C. F. Stevens*
- Letters to the Editor*
- 847 DOES PHOSPHOLIPID FLIP-FLOP AFFECT AXON POTASSIUM CHANNELS? *Gerald Ehrenstein, Daniel L. Gilbert, and Raymond J. Lipicky*
- 850 MECHANICS OF ELECTROCOMPRESSION OF LIPID BILAYER MEMBRANES. *E. A. Evans and S. Simon*
