

BIOPHYSICAL JOURNAL

CONTENTS

March 1966 volume 6 number 2

- 125 STUDIES OF CHLOROPLAST DEVELOPMENT IN *Euglena* XIII. VARIATION OF ULTRAVIOLET SENSITIVITY WITH EXTENT OF CHLOROPLAST DEVELOPMENT. *Helene Z. Hill, Jerome A. Schiff, and H. T. Epstein*
- 135 STUDIES OF CHLOROPLAST DEVELOPMENT IN *Euglena* XIV. SEQUENTIAL INTERACTIONS OF ULTRAVIOLET LIGHT AND PHOTOREACTIVATING LIGHT IN GREEN COLONY FORMATION. *Helene Z. Hill, H. T. Epstein, and Jerome A. Schiff*
- 145 A MODEL FOR THE ACTION OF VINBLASTINE IN VIVO. *F. A. Valeriote, W. R. Bruce, and B. E. Meeker*
- 153 SOME CHARACTERISTICS OF THE RESISTANCE TRANSFER FACTOR (RTF) EPISOME AS DETERMINED BY INACTIVATION WITH TRITIUM, P^{32} , AND GAMMA RADIATION. *Robert B. Painter and Herbert S. Ginoza*
- 163 LIMITATIONS ON THE EQUIVALENT CARDIAC GENERATOR. *Robert Plonsey*
- 175 ORIENTATION IN SYSTEMS WITH ASYMMETRIC DENSITY DISTRIBUTION. *S. J. Sluka, A. H. Smith, and E. L. Besch*
- 189 ENVIRONMENTAL FACTORS INFLUENCING THE HYPERFINE STRUCTURE OF MANGANOUS LOW-TEMPERATURE ELECTRON PARAMAGNETIC RESONANCE SPECTRA. *D. W. Nebert and B. T. Allen*
- 201 INTERSPIKE INTERVAL FLUCTUATIONS IN THE CRAYFISH STRETCH RECEPTOR. *David R. Firth*
- 217 THE KINETICS OF OSMOTIC TRANSPORT THROUGH PORES OF MOLECULAR DIMENSIONS. *H. C. Longuet-Higgins and G. Austin*
