

# Biophysical Journal

## Contents

June 2007

Volume 92

Number 12

### Biophysical Letters

Highlighted Generation of Fluorescence Signals Using Simultaneous Two-Color Irradiation on Dronpa Mutants. *Ryoko Ando, Cristina Flors, Hideaki Mizuno, Johan Hofkens, and Atsushi Miyawaki* ..... L97–L99

Molecular Dynamics Simulations of Indolicidin Association with Model Lipid Bilayers. *Jenny C. Y. Hsu and Christopher M. Yip* ..... L100–L102

On the Equivalence Point for Ammonium (De)protonation during Its Transport through the AmtB Channel. *David L. Bostick and Charles L. Brooks III* ..... L103–L105

Photoisomerization Mechanism of Rhodopsin and 9-*cis*-Rhodopsin Revealed by X-ray Crystallography. *Hitoshi Nakamichi, Volker Buss, and Tetsuji Okada* ..... L106–L108

Optimal Specificity and Function for Flexible Biomolecular Recognition. *Jin Wang, Li Xu, and Erkwang Wang* ..... L109–L111

### New and Notable

Unraveling Individual Molecules by Mechanical Forces: Theory Meets Experiment. *Dmitrii E. Makarov* ..... 4135–4136

### Biophysical Reviews and Perspectives

Tracking Single Kinesin Molecules in the Cytoplasm of Mammalian Cells. *Dawen Cai, Kristen J. Verhey, and Edgar Meyhöfer* ..... 4137–4144

### Biophysical Theory and Modeling

Toward a Mathematical Model of the Assembly and Disassembly of Membrane Microdomains: Comparison with Experimental Models. *G. Richardson, L. J. Cummings, H. J. Harris, and P. O'Shea* ..... 4145–4156

Reparameterization of All-Atom Dipalmitoylphosphatidylcholine Lipid Parameters Enables Simulation of Fluid Bilayers at Zero Tension. *Jacob Sonne, Morten Ø. Jensen, Flemming Y. Hansen, Lars Hemmingsen, and Günther H. Peters* ..... 4157–4167

Fretting about FRET: Correlation between  $\kappa$  and  $R$ . *Darren B. VanBeek, Matthew C. Zwier, Justin M. Shorb, and Brent P. Krueger* ..... 4168–4178

HIV-1 Protease Substrate Binding and Product Release Pathways Explored with Coarse-Grained Molecular Dynamics. *Joanna Trylska, Valentina Tozzini, Chia-en A. Chang, and J. Andrew McCammon* ..... 4179–4187

Extracting Kinetics from Single-Molecule Force Spectroscopy: Nanopore Unzipping of DNA Hairpins. *Olga K. Dudko, Jérôme Mathé, Attila Szabo, Amit Meller, and Gerhard Hummer* ..... 4188–4195

Mechanisms of B-Cell Synapse Formation Predicted by Monte Carlo Simulation. *Philippos K. Tsourkas, Nicole Baumgarth, Scott I. Simon, and Subhadip Raychaudhuri* ..... 4196–4208

Ion Transport across Transmembrane Pores. *Hari Leontiadou, Alan E. Mark, and Siewert-Jan Marrink* ..... 4209–4215

A Steady-State Model of Spreading Depression Predicts the Importance of an Unknown Conductance in Specific Dendritic Domains. *Julia Makarova, José M. Ibarz, Santiago Canals, and Oscar Herreras* ..... 4216–4232

Molecular Dynamics Simulations of a Stretch-Activated Channel Inhibitor GsMTx4 with Lipid Membranes: Two Binding Modes and Effects of Lipid Structure. *Manami Nishizawa and Kazuhisa Nishizawa* ..... 4233–4243

Contents (continued)

Quantum and Molecular Dynamics Study for Binding of Macrocyclic Inhibitors to Human $\alpha$ -Thrombin. <i>Emilia L. Wu, Ye Mei, KeLi Han, and John Z. H. Zhang</i> .....	4244–4253	Behavior of Giant Vesicles with Anchored DNA Molecules. <i>Vesselin Nikolov, Reinhard Lipowsky, and Rumiana Dimova</i> .....	4356–4368
Molecular Dynamics Simulations of Lipid Vesicle Fusion in Atomic Detail. <i>Volker Knecht and Siewert-Jan Marrink</i> .....	4254–4261	Atomic Force Microscope Studies of the Fusion of Floating Lipid Bilayers. <i>Midhat H. Abdulreda and Vincent T. Moy</i> .....	4369–4378
Molecular Dynamics Simulations Using Temperature-Enhanced Essential Dynamics Replica Exchange. <i>Marcus B. Kubitzki and Bert L. de Groot</i> .....	4262–4270	<b>Muscle and Contractility</b>	
From Single-Cell Genetic Architecture to Cell Population Dynamics: Quantitatively Decomposing the Effects of Different Population Heterogeneity Sources for a Genetic Network with Positive Feedback Architecture. <i>Nikos V. Mantzaris</i> .....	4271–4288	The Effects of Force Inhibition by Sodium Vanadate on Cross-Bridge Binding, Force Redevelopment, and $\text{Ca}^{2+}$ Activation in Cardiac Muscle. <i>D. A. Martyn, L. Smith, K. L. Kreuziger, S. Xu, L. C. Yu, and M. Regnier</i> .....	4379–4390
Coarse-Grained Peptide Modeling Using a Systematic Multiscale Approach. <i>Jian Zhou, Ian F. Thorpe, Sergey Izvekov, and Gregory A. Voth</i> .....	4289–4303	<b>Nucleic Acids</b>	
Modeling of the Role of a Bax-Activation Switch in the Mitochondrial Apoptosis Decision. <i>Chun Chen, Jun Cui, Haizhu Lu, Rui Wang, Shuai Zhang, and Pingping Shen</i> .....	4304–4315	Effector-Stimulated Single Molecule Protein-DNA Interactions of a Quorum-Sensing System in <i>Sinorhizobium meliloti</i> . <i>Frank Wilco Bartels, Matthew McIntosh, Alexander Fuhrmann, Christoph Metzendorf, Patrik Plattner, Norbert Sewald, Dario Anselmetti, Robert Ros, and Anke Becker</i> .....	4391–4400
Coarse-Grained Strategy for Modeling Protein Stability in Concentrated Solutions. III: Directional Protein Interactions. <i>Jason K. Cheung, Vincent K. Shen, Jeffrey R. Errington, and Thomas M. Truskett</i> ....	4316–4324	<b>Photobiophysics</b>	
<b>Channels, Receptors, and Electrical Signaling</b>		Tracking Local Conformational Changes of Ribonuclease A Using Picosecond Time-Resolved Fluorescence of the Six Tyrosine Residues. <i>Melinda Noronha, João C. Lima, Emanuele Paci, Helena Santos, and António L. Maçanita</i> .....	4401–4414
Defining the Interface between the C-terminal Fragment of $\alpha$ -Transducin and Photoactivated Rhodopsin. <i>Christina M. Taylor, Gregory V. Nikiforovich, and Garland R. Marshall</i> .....	4325–4334	<b>Proteins</b>	
Backbone Structure of the Amantadine-Blocked <i>Trans</i> -Membrane Domain M2 Proton Channel from Influenza A Virus. <i>Jun Hu, Tom Asbury, Srisairam Achuthan, Conggang Li, Richard Bertram, Jack R. Quine, Riqiang Fu, and Timothy A. Cross</i> .....	4335–4343	Understanding Ligand Binding Effects on the Conformation of Estrogen Receptor $\alpha$ -DNA Complexes: A Combinational Quartz Crystal Microbalance with Dissipation and Surface Plasmon Resonance Study. <i>Wendy Y. X. Peh, Erik Reimhult, Huey Fang Teh, Jane S. Thomsen, and Xiaodi Su</i> .....	4415–4423
<b>Membranes</b>		Low-Resolution Structure and Fluorescence Anisotropy Analysis of Protein Tyrosine Phosphatase $\eta$ Catalytic Domain. <i>Huita C. Matozo, Maria A. M. Santos, Mario de Oliveira Neto, Lucas Bleicher, Luís Mauricio T. R. Lima, Rodolfo Iuliano, Alfredo Fusco, and Igor Polikarpov</i> .....	4424–4432
Pore Formation in a Lipid Bilayer under a Tension Ramp: Modeling the Distribution of Rupture Tensions. <i>Pierre-Alexandre Boucher, Béla Joós, Martin J. Zuckermann, and Luc Fournier</i> .....	4344–4355	<b>Spectroscopy, Imaging, Other Techniques</b>	
		Multidimensional Detection and Analysis of $\text{Ca}^{2+}$ Sparks in Cardiac Myocytes. <i>Mark-Anthony Bray, Nicholas A. Geisse, and Kevin Kit Parker</i> .....	4433–4443

Contents (continued)

Diffusion of Insulin-Like Growth Factor-I and Ribonuclease through Fibrin Gels. <i>Jess V. Nauman, Phil G. Campbell, Frederick Lanni, and John L. Anderson</i> .....	4444–4450	<b>Cell Biophysics</b>	
Two-Photon Excitation and Photoconversion of EosFP in Dual-Color 4Pi Confocal Microscopy. <i>Sergey Ivanchenko, Sylvia Glaschick, Carlheinz Röcker, Franz Oswald, Jörg Wiedenmann, and G. Ulrich Nienhaus</i> .....	4451–4457	Intrinsic Fluctuations, Robustness, and Tunability in Signaling Cycles. <i>Joseph Levine, Hao Yuan Kueh, and Leonid Mirny</i> .....	4473–4481
A New Approach to the Detection and Statistical Classification of Ca <sup>2+</sup> Sparks. <i>Tamás Bányász, Ye Chen-Izu, C. W. Balke, and Leighton T. Izu</i> .....	4458–4465	Elastic Properties of the Cell Surface and Trafficking of Single AMPA Receptors in Living Hippocampal Neurons. <i>Alexandre Yersin, Harald Hirling, Sandor Kasas, Charles Roduit, Karina Kulangara, Giovanni Dietler, Frank Lafont, Stefan Catsicas, and Pascal Steiner</i> .....	4482–4489
Detection of Protein Orientation on the Silica Microsphere Surface Using Transverse Electric/Transverse Magnetic Whispering Gallery Modes. <i>Mayumi Noto, David Keng, Iwao Teraoka, and Stephen Arnold</i> .....	4466–4472	<b>Author Index</b> .....	4490

### Advertisers Index

Below are this month's Biophysical Journal advertisers. When you communicate with an advertiser, please let them know you heard about them through the Biophysical Journal and the Biophysical Society web site.

**Jackson Laboratory** [www.jax.org/courses](http://www.jax.org/courses) 207-288-6257

**Viscotek** [www.viscotek.com](http://www.viscotek.com) 800-375-5966

For information on advertising in the Biophysical Society's publications, contact the society office at 301-634-7114, or E-mail [society@biophysics.org](mailto:society@biophysics.org).
